ACADEMIC PROJECT:

PROJECT 1-

Project Title: EDUcitate

System/Component: Web Based Learning Management System

Major Technology:

- Frontend: HTML, CSS, Bootstrap
- Backend: PHP
- Database: MySQL

Project Detail Description:

Web based learning exploits interactive technologies and communication systems to improve the learning experience. It has the potential to transform the way we teach and learn across the board. It can raise standards, and widen participation in lifelong learning.

INDUSTRIAL TRAINING PROJECT:

PROJECT –

Project Title: School Management System (SMS)

System/Component: Management

Major Technology:

- Frontend: HTML, CSS, Bootstrap
- Backend: Python, Django, Rest-Framework
- Database: MySQL

Project Detail Description:

The school management system is a web-based system which will use as a platform for interaction between student, teachers and parents. While the main objective of this project is to computerize the paperwork in the system and automate the work. The computerization is done so that the storage of all the details regarding students and teachers will be stored in the system which makes system centralized and the chance of duplication of any data is minimized. While by doing automation to the system will reduce the time for storing any data in the system.
